

School Curriculum

★Mentally -challenged student's educational section ★

Career Specific Training Course

The main purpose is to develop students' basic attitudes for career life.

Students take a course system so that they can experience industrial structure such as planning, production, and sales. We boost their motivation for working and aim them to have job independence. Students are supposed to have three job experience practices each year.

Educational goals

- The students try to practice skills for working a variety of jobs
- The students try to be highly motivated and have a proactive attitude for work
- The students try to have basic skills to work.

Four courses to build up working skills

Manufacturing Technology Course

The students practice woodworking. They manufacture a variety of things such as chairs, boxes, stepladders, and so on.

Agricultural Course

The students grow flowers, vegetables, and fruits. They also take care of flower beds.

Craft Technology Course

The students make ceramics. They create mugs, dishes, bowls, and ornaments.

Leatherwork Course

The students produce eco-friendly coasters, accessory, pouches, wallets, key chains, strap and so on, all with local leather.

Students can work to acquire certification in:

- Forklift use • Crane use • Small construction machinery
- Assisted Living Helper , 2nd grade level
- Computer license • Computer typing license
- The Japanese Kanji aptitude exam

★Physically—challenged student’s educational section★

Standard Curriculum Course

Students follow the government-decided general high school curriculum. Depending on their own future careers, they prepare to take the entrance exams for universities or they learn important basic academic skills for jobs and life.

Classes are conducted according to student’s ability and according level.

Vocational (commerce) Course

Students study along with the government- decided commercial high school curriculum and aim for acquisition of qualifications such as bookkeeping, word processor use and so on.

Students can work to acquire certification in :

- The Official Business Skill Test in Bookkeeping
- Examination in Technical Ability of Data Processing
- Examination in Japanese Word Processing
- Computer license • Computer typing license
- The Japanese Kanji aptitude exam
- The Eiken Test in Practical English Proficiency
